C

01 / THE PROBLEM

Most of what a developer knows never reaches the codebase.

until now.

cortex

your developer's
second brain

BUILT ON IBM BOB & GRANITE

02 / ARCHITECTURE

Memory.
Reasoning.
Action.

THREE LAYERS. ONE BRAIN.

A fast local diary, IBM Granite for reasoning, IBM Bob for the work.

01 · MEMORY

Diary

Captures every thought, decision and snippet. Tagged. Embedded. Indexed in milliseconds.

on-device · sqlite-vec

02 · REASONING

Granite

Reasons over your own context, with citations to the source entry. Local. Private. Fast.

IBM watsonx · Granite

03 · ACTION

Bob

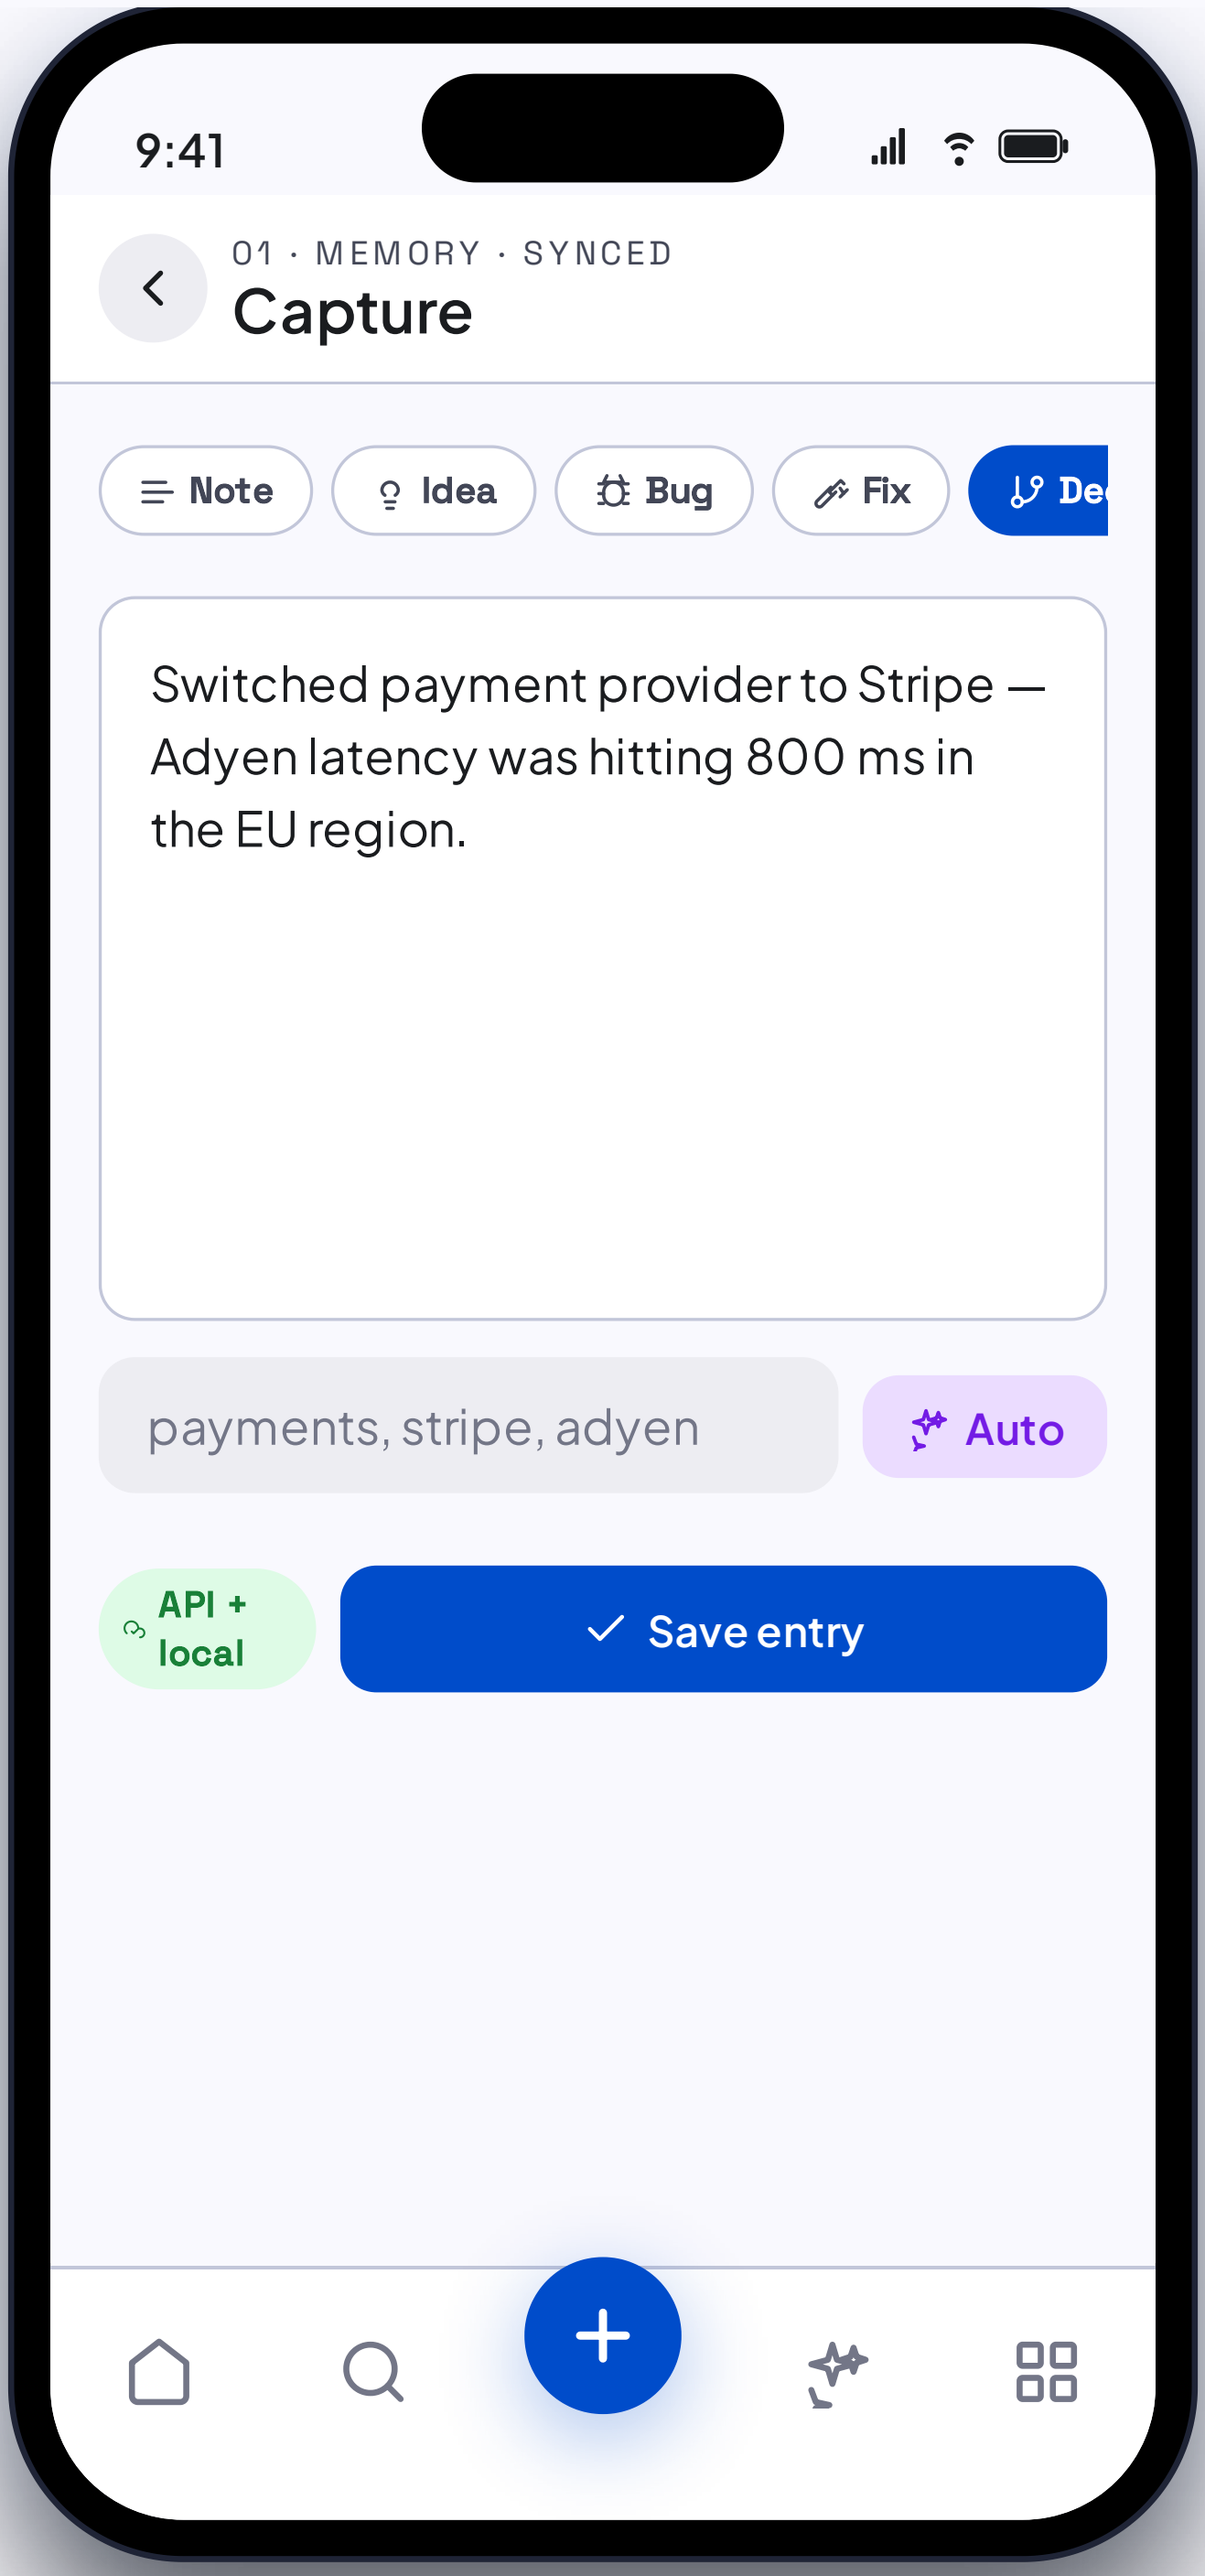
Picks up complex tasks at the start of its next session — with full diary context already in hand.

IBM Bob · MCP

03 / CAPTURE

Capture without breaking flow.

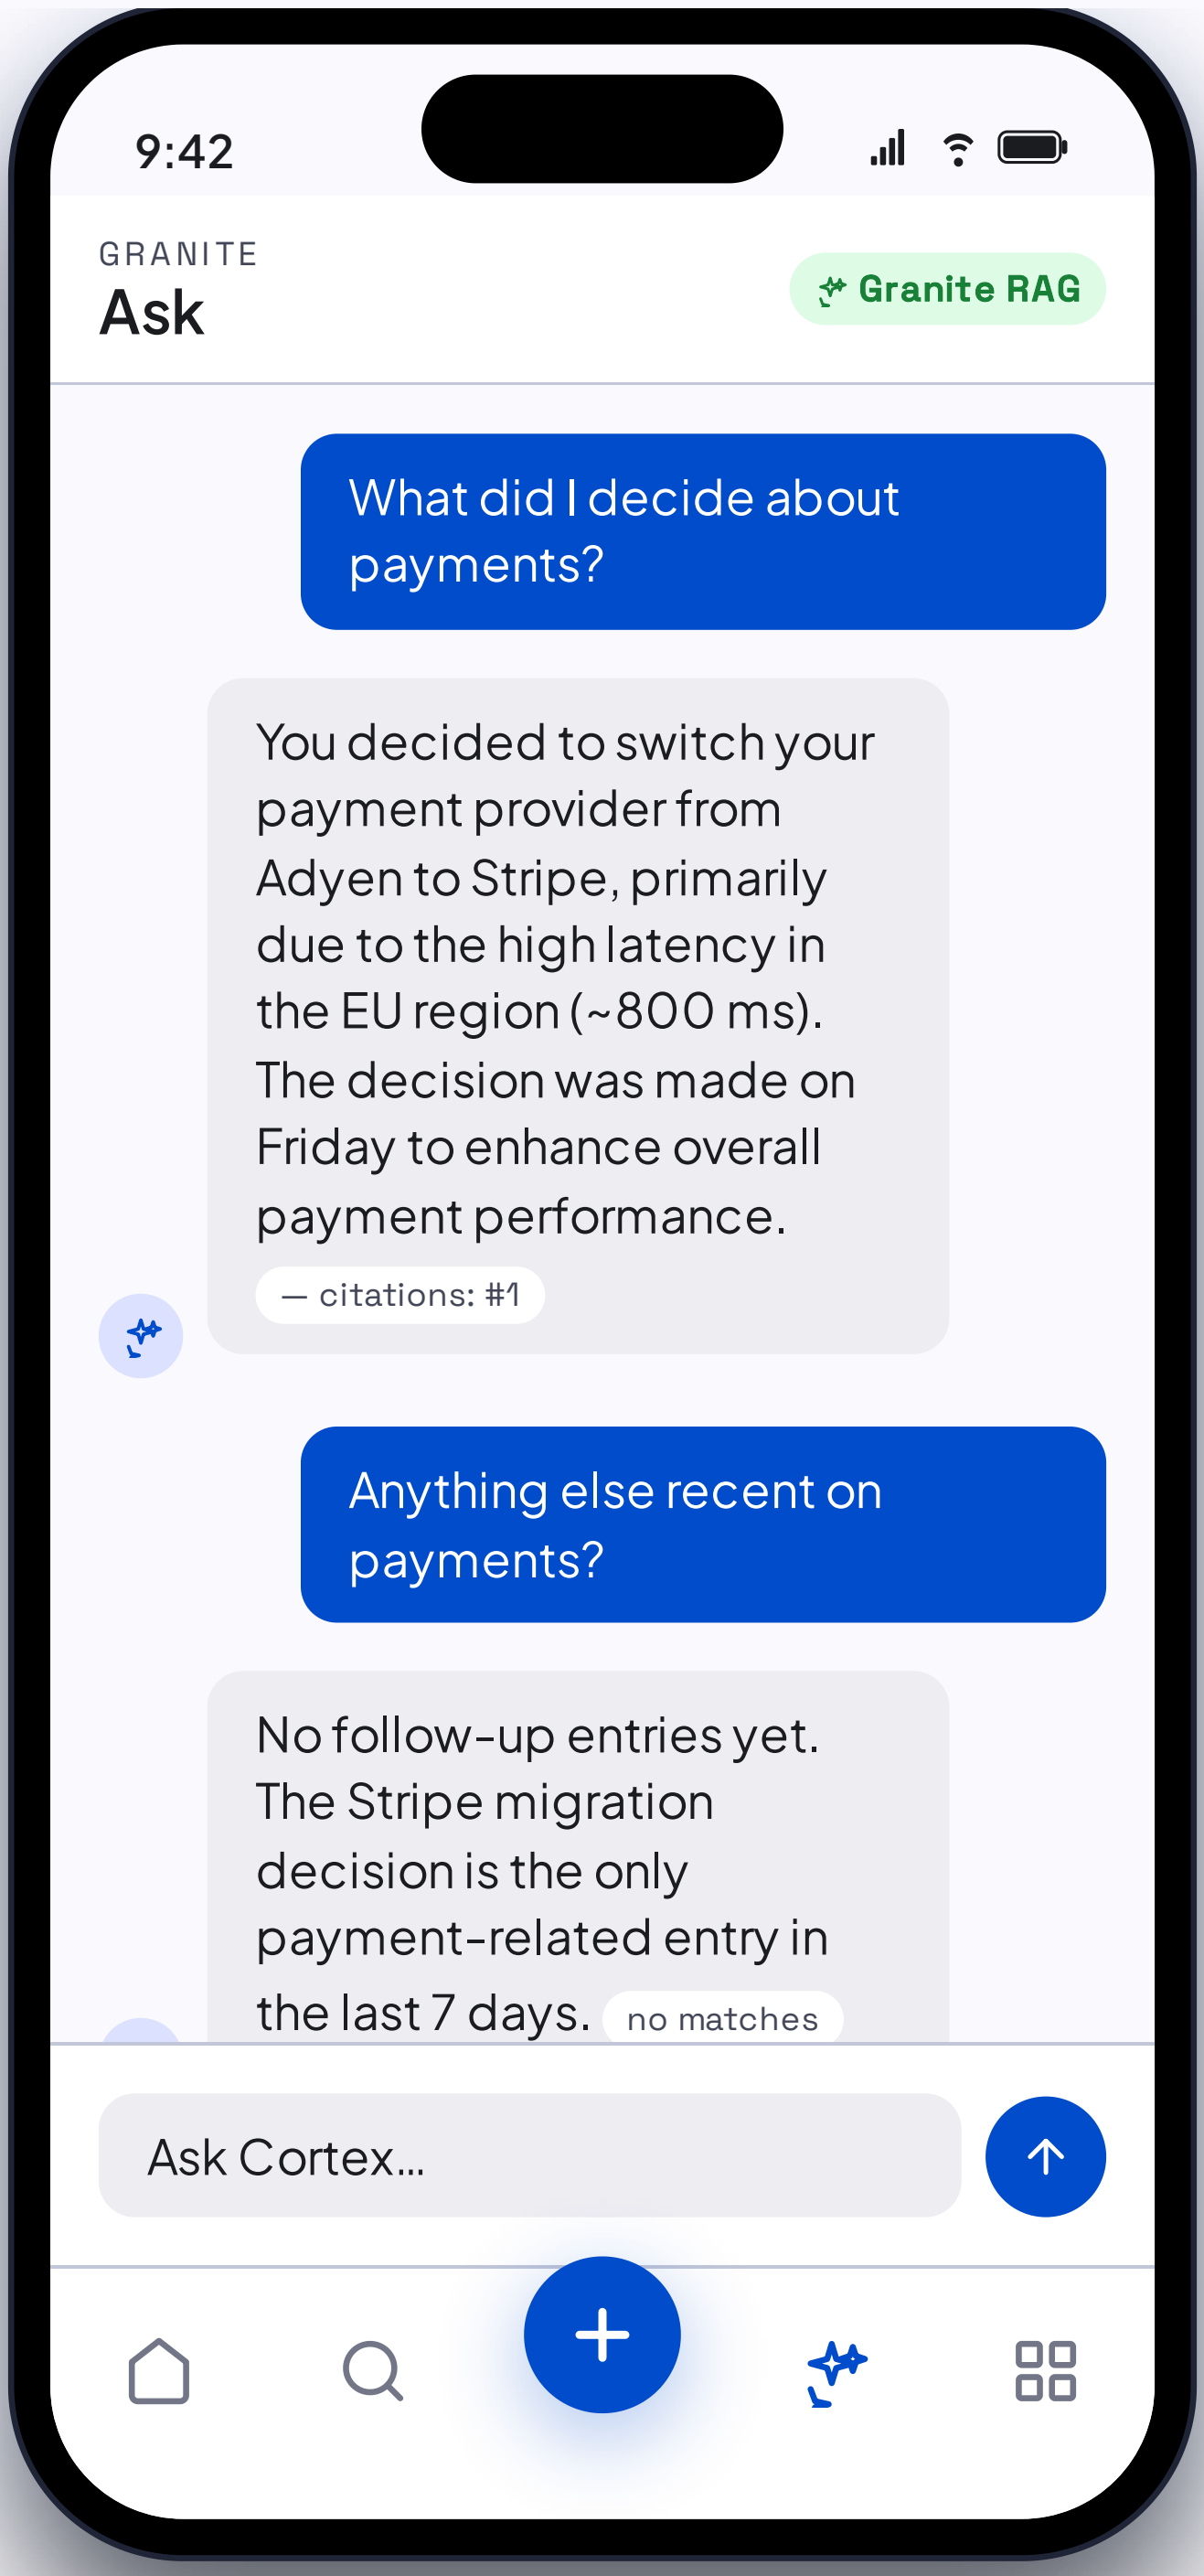
phone · terminal · telegram · 240 ms to indexed



04 / RECALL

Recall by intent.

granite · local · cited



05 / ROUTING

Some questions need an answer. Others need work.

REASONING

→ granite

Answered now.

Local model. Streams in milliseconds. Cites the source entry.

latency · ~ms · on-device

ACTION

→ bob

Queued for work.

Cortex hands the task to IBM Bob with the full diary context attached.

latency · async · full context

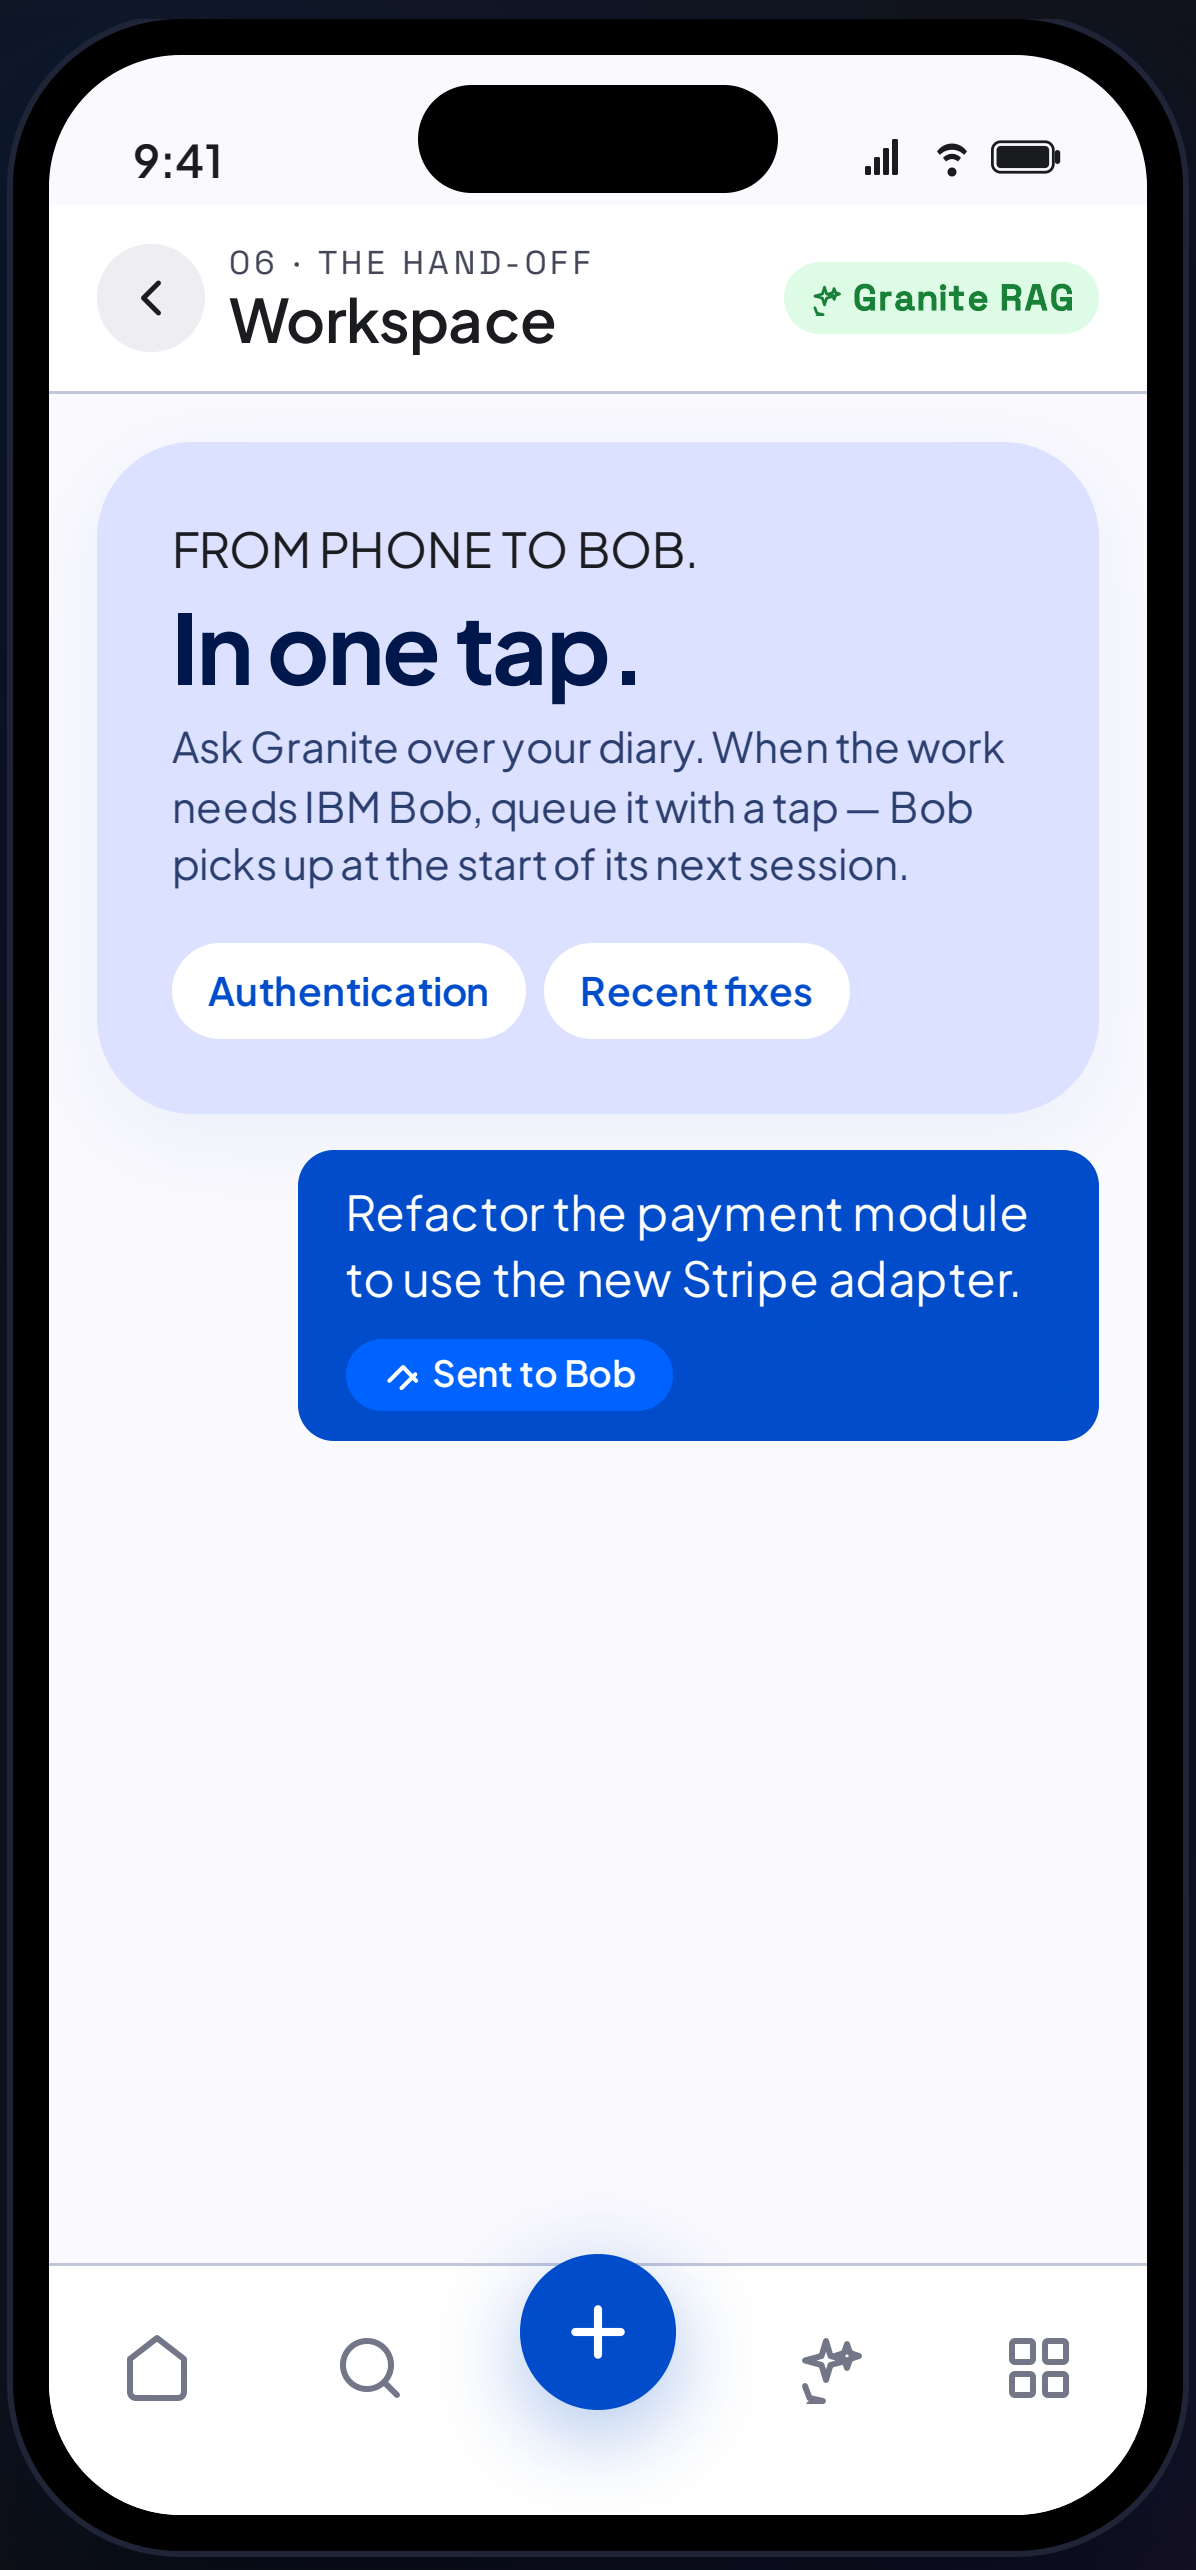
06 / THE HAND-OFF

From phone to Bob.

IN ONE TAP

[09:14 · THE NEXT MORNING]

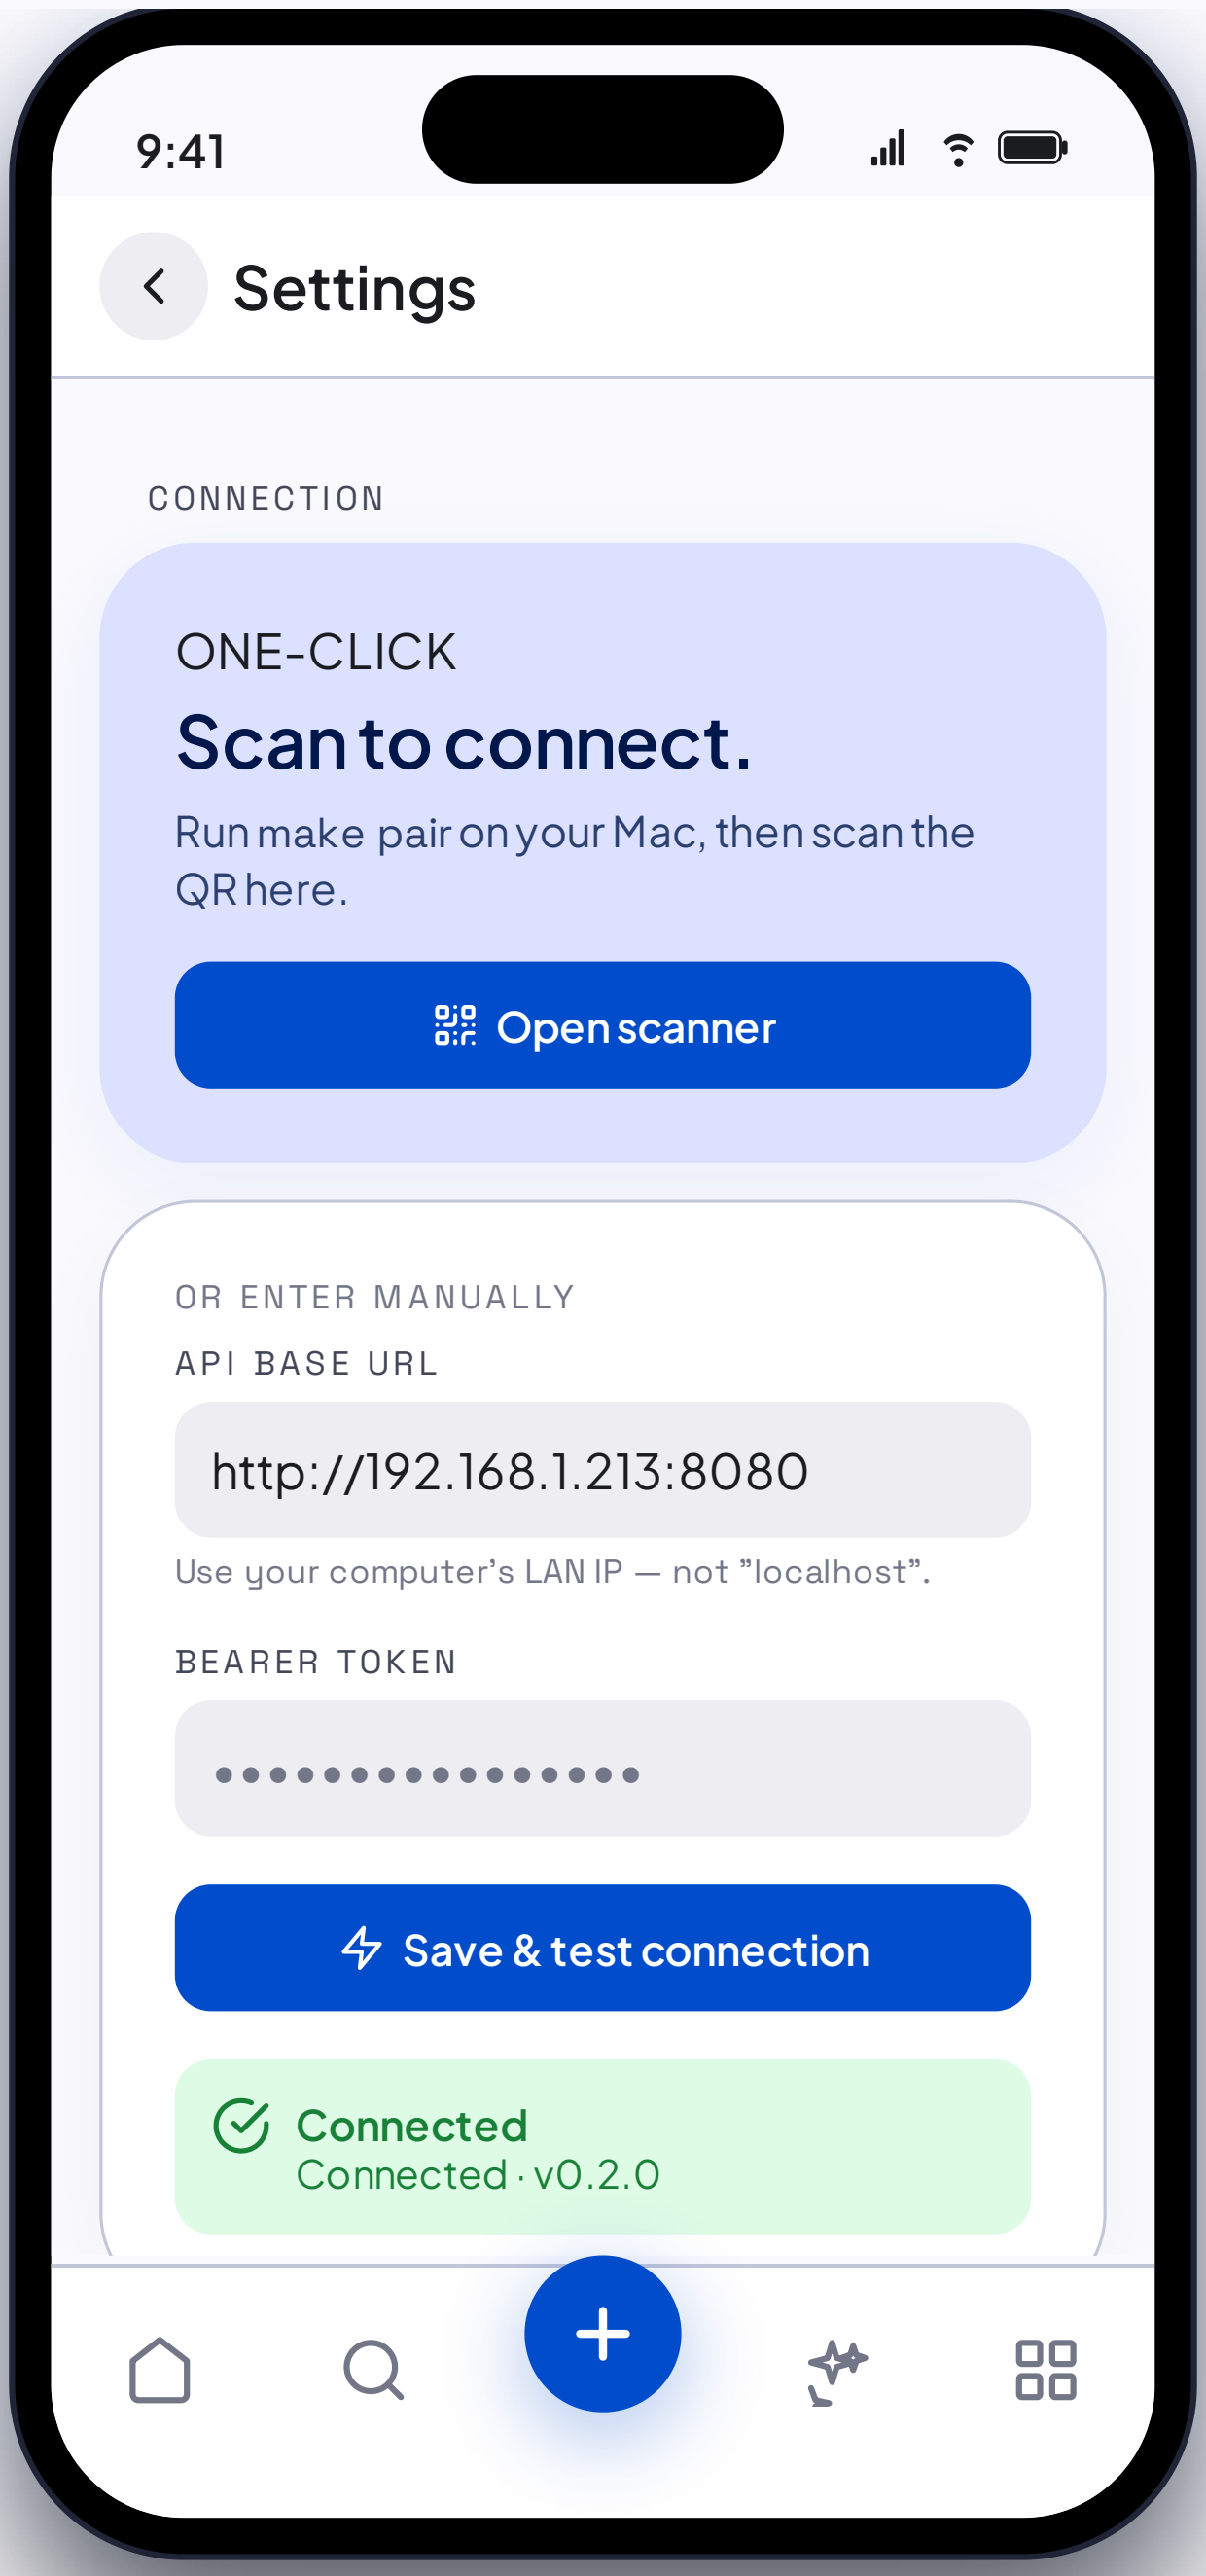
Bob picks up where you left off.



07 / INSTALL

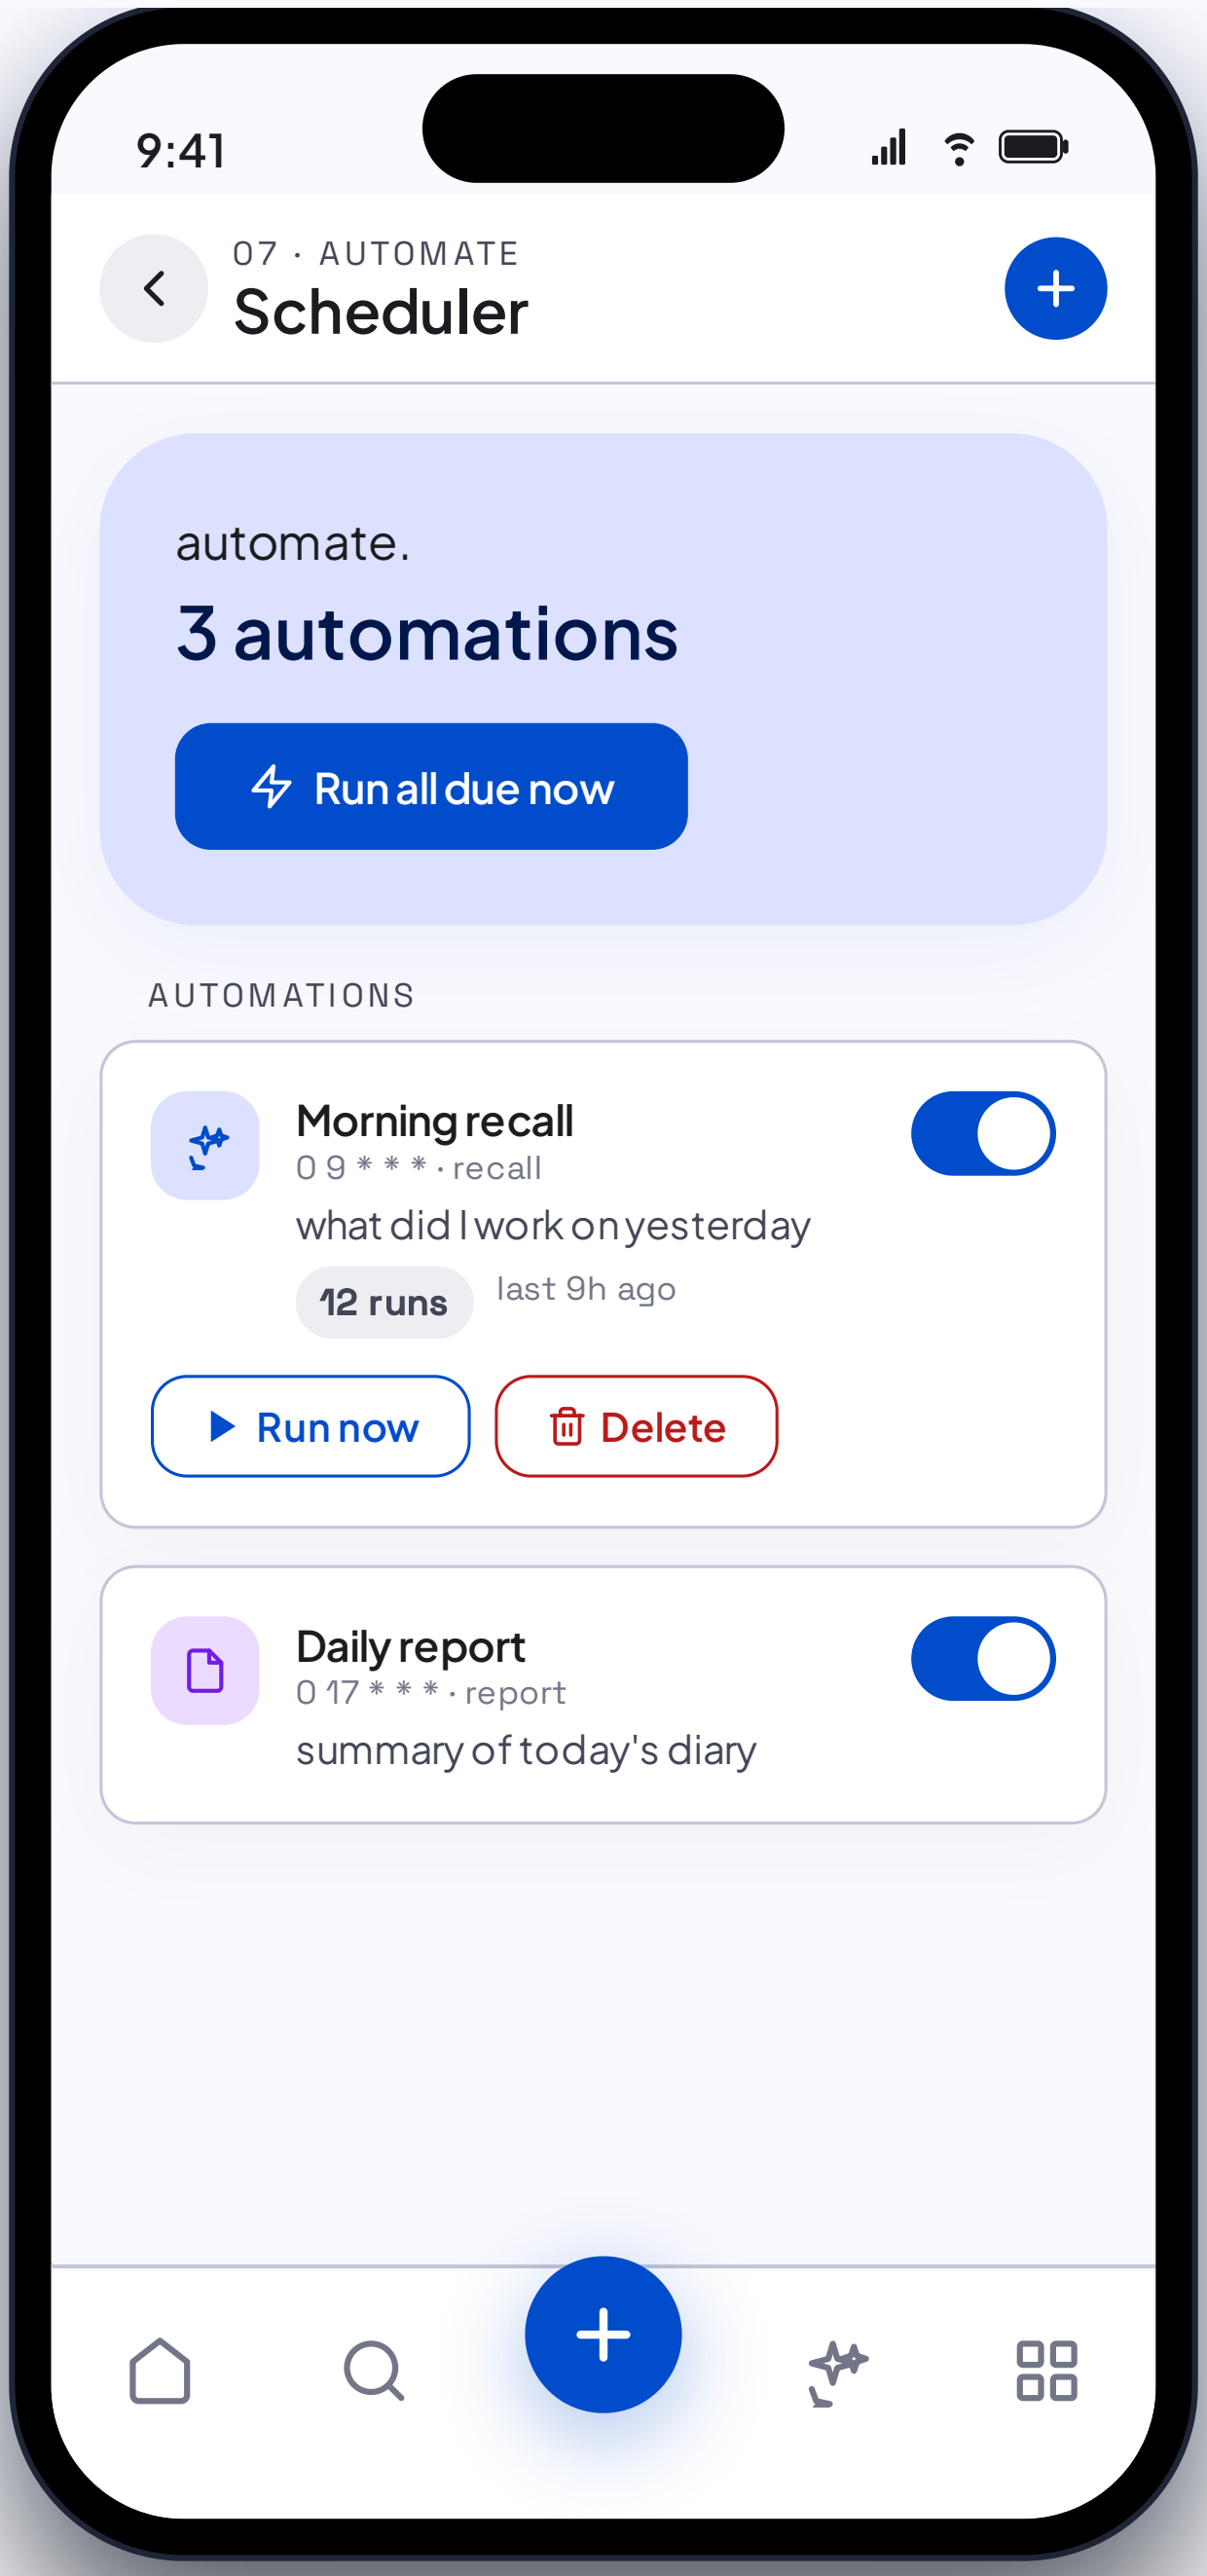
One command. Then scan.

macOS · linux · windows



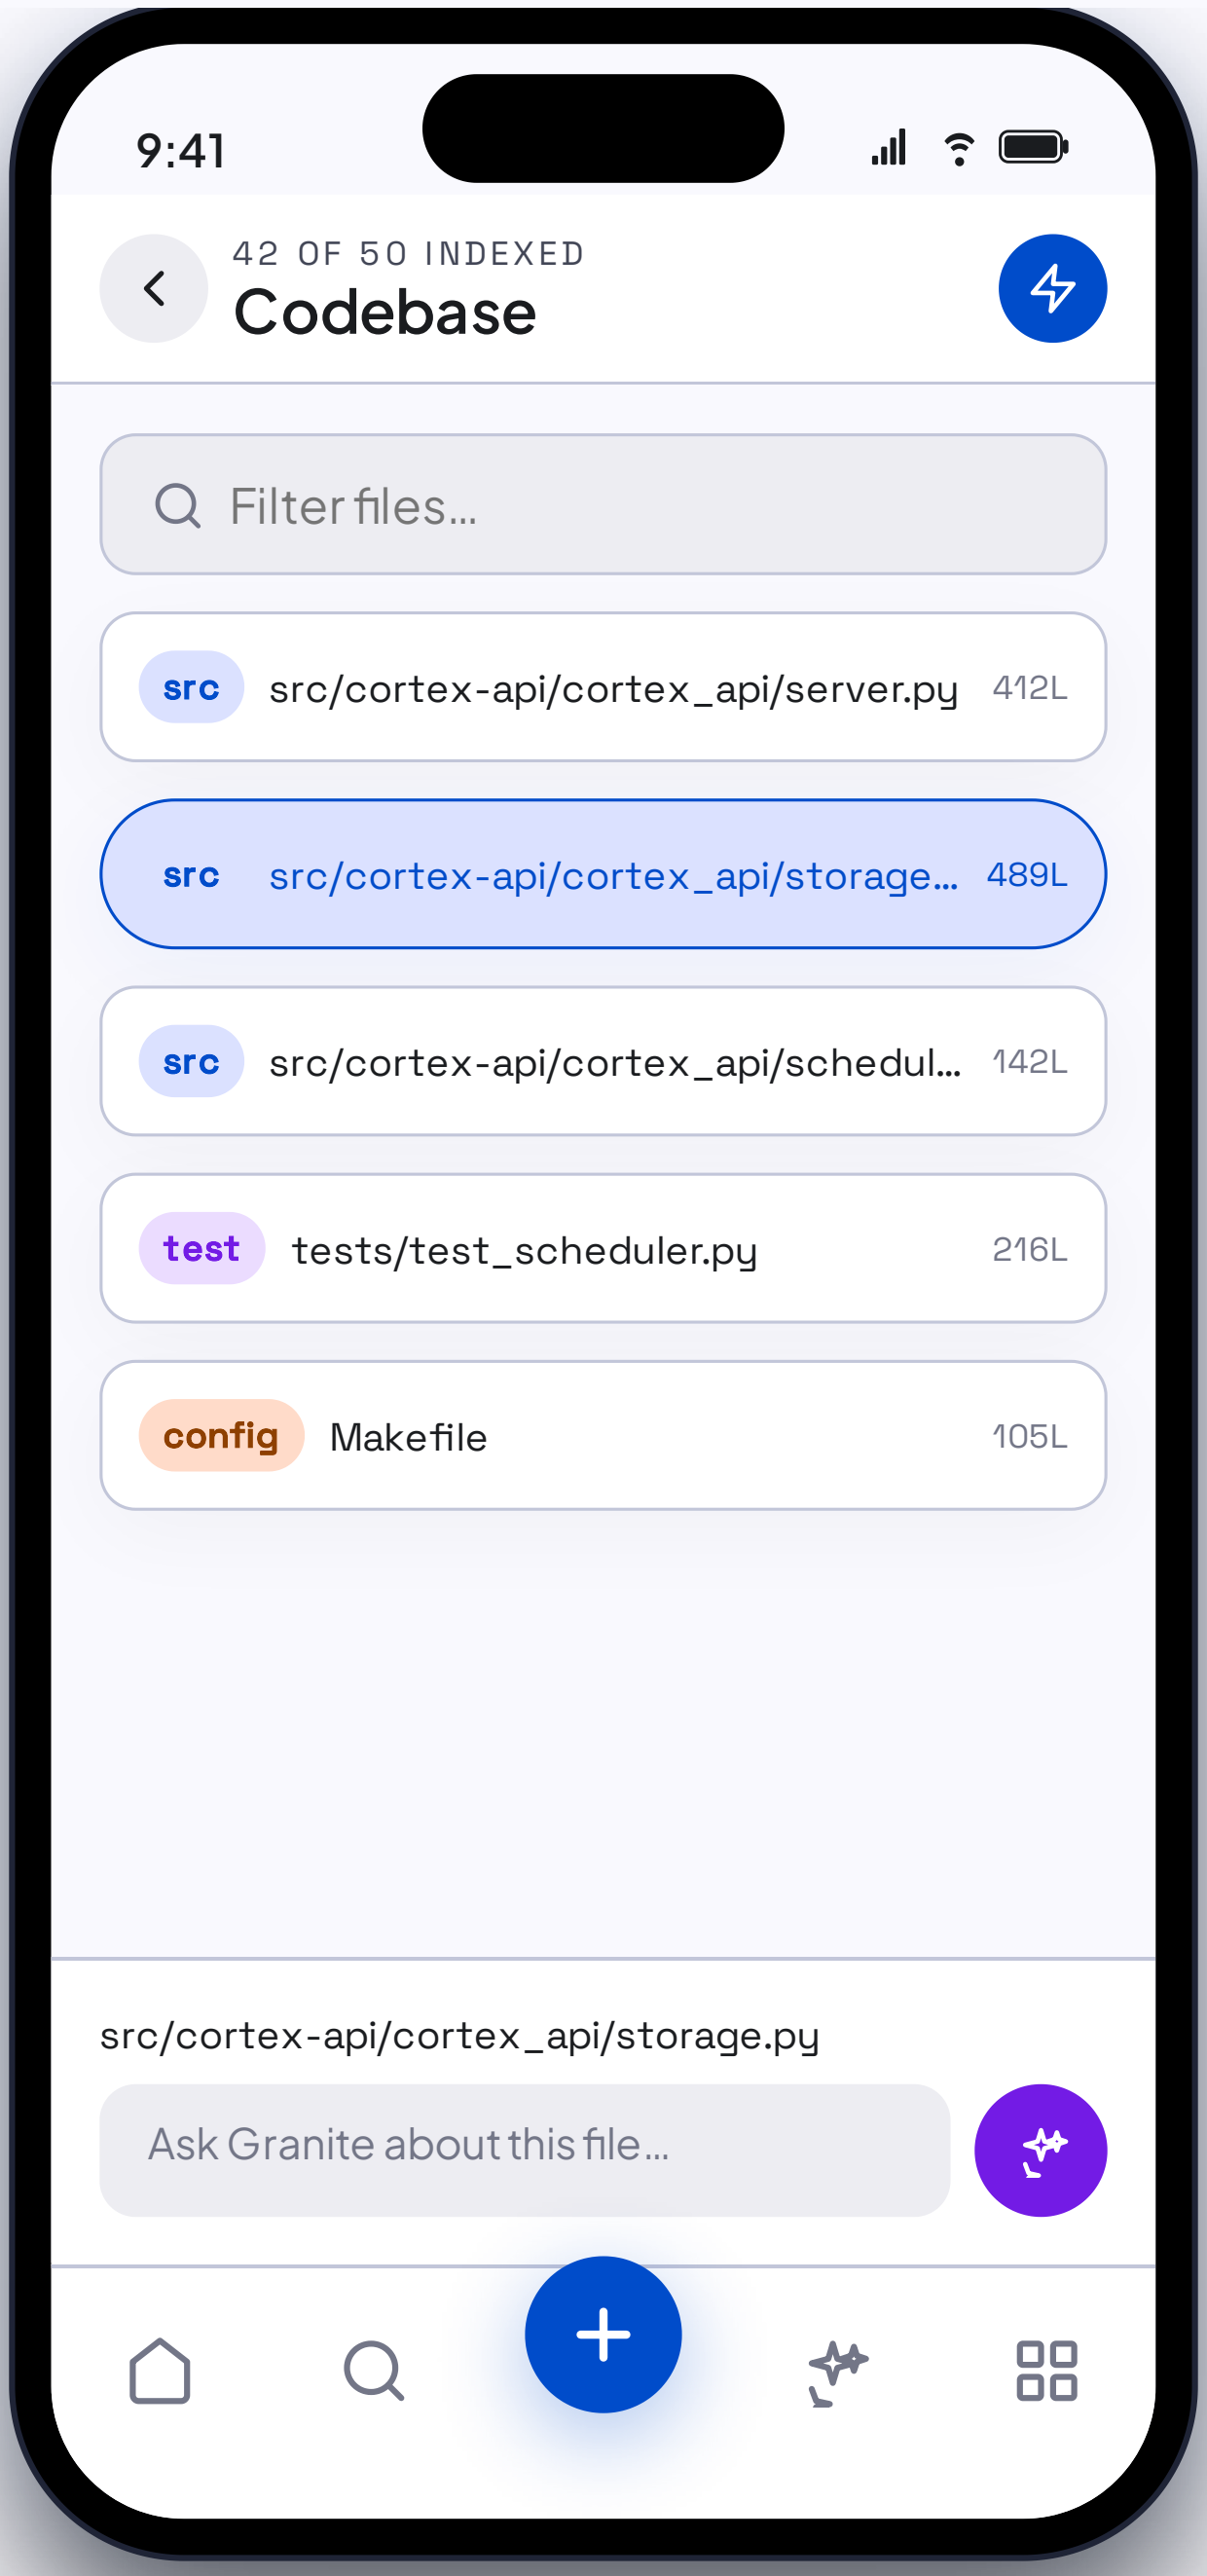
automate.

cron-scheduled recalls + reports



analyze.

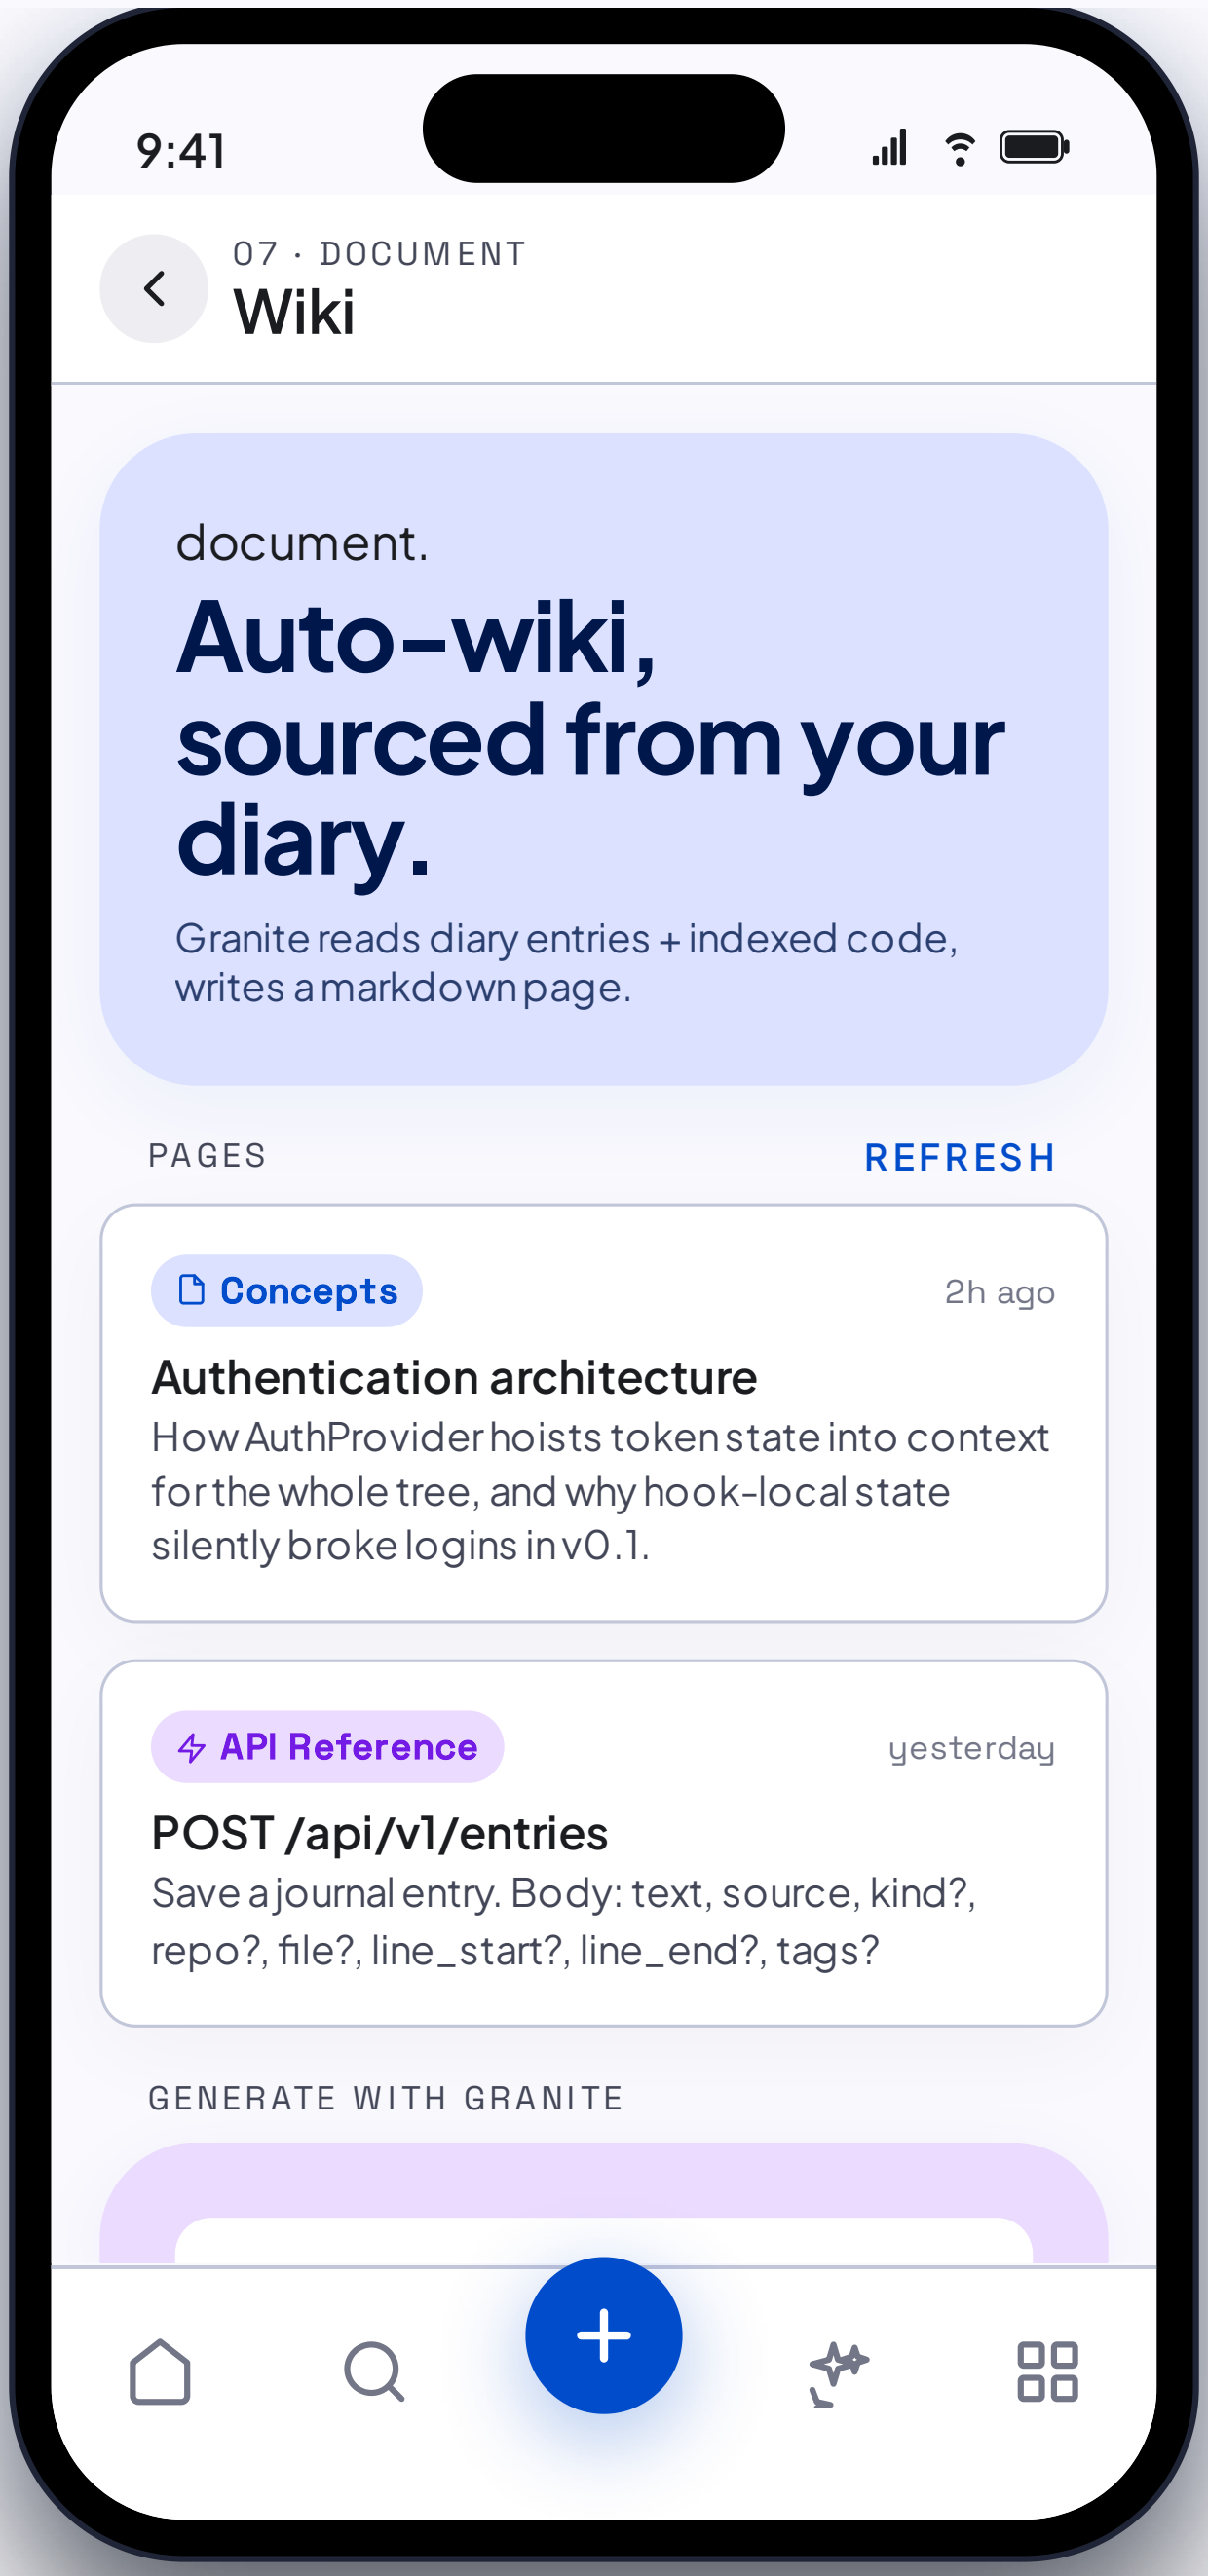
granite over your codebase



08 / THE SYSTEM

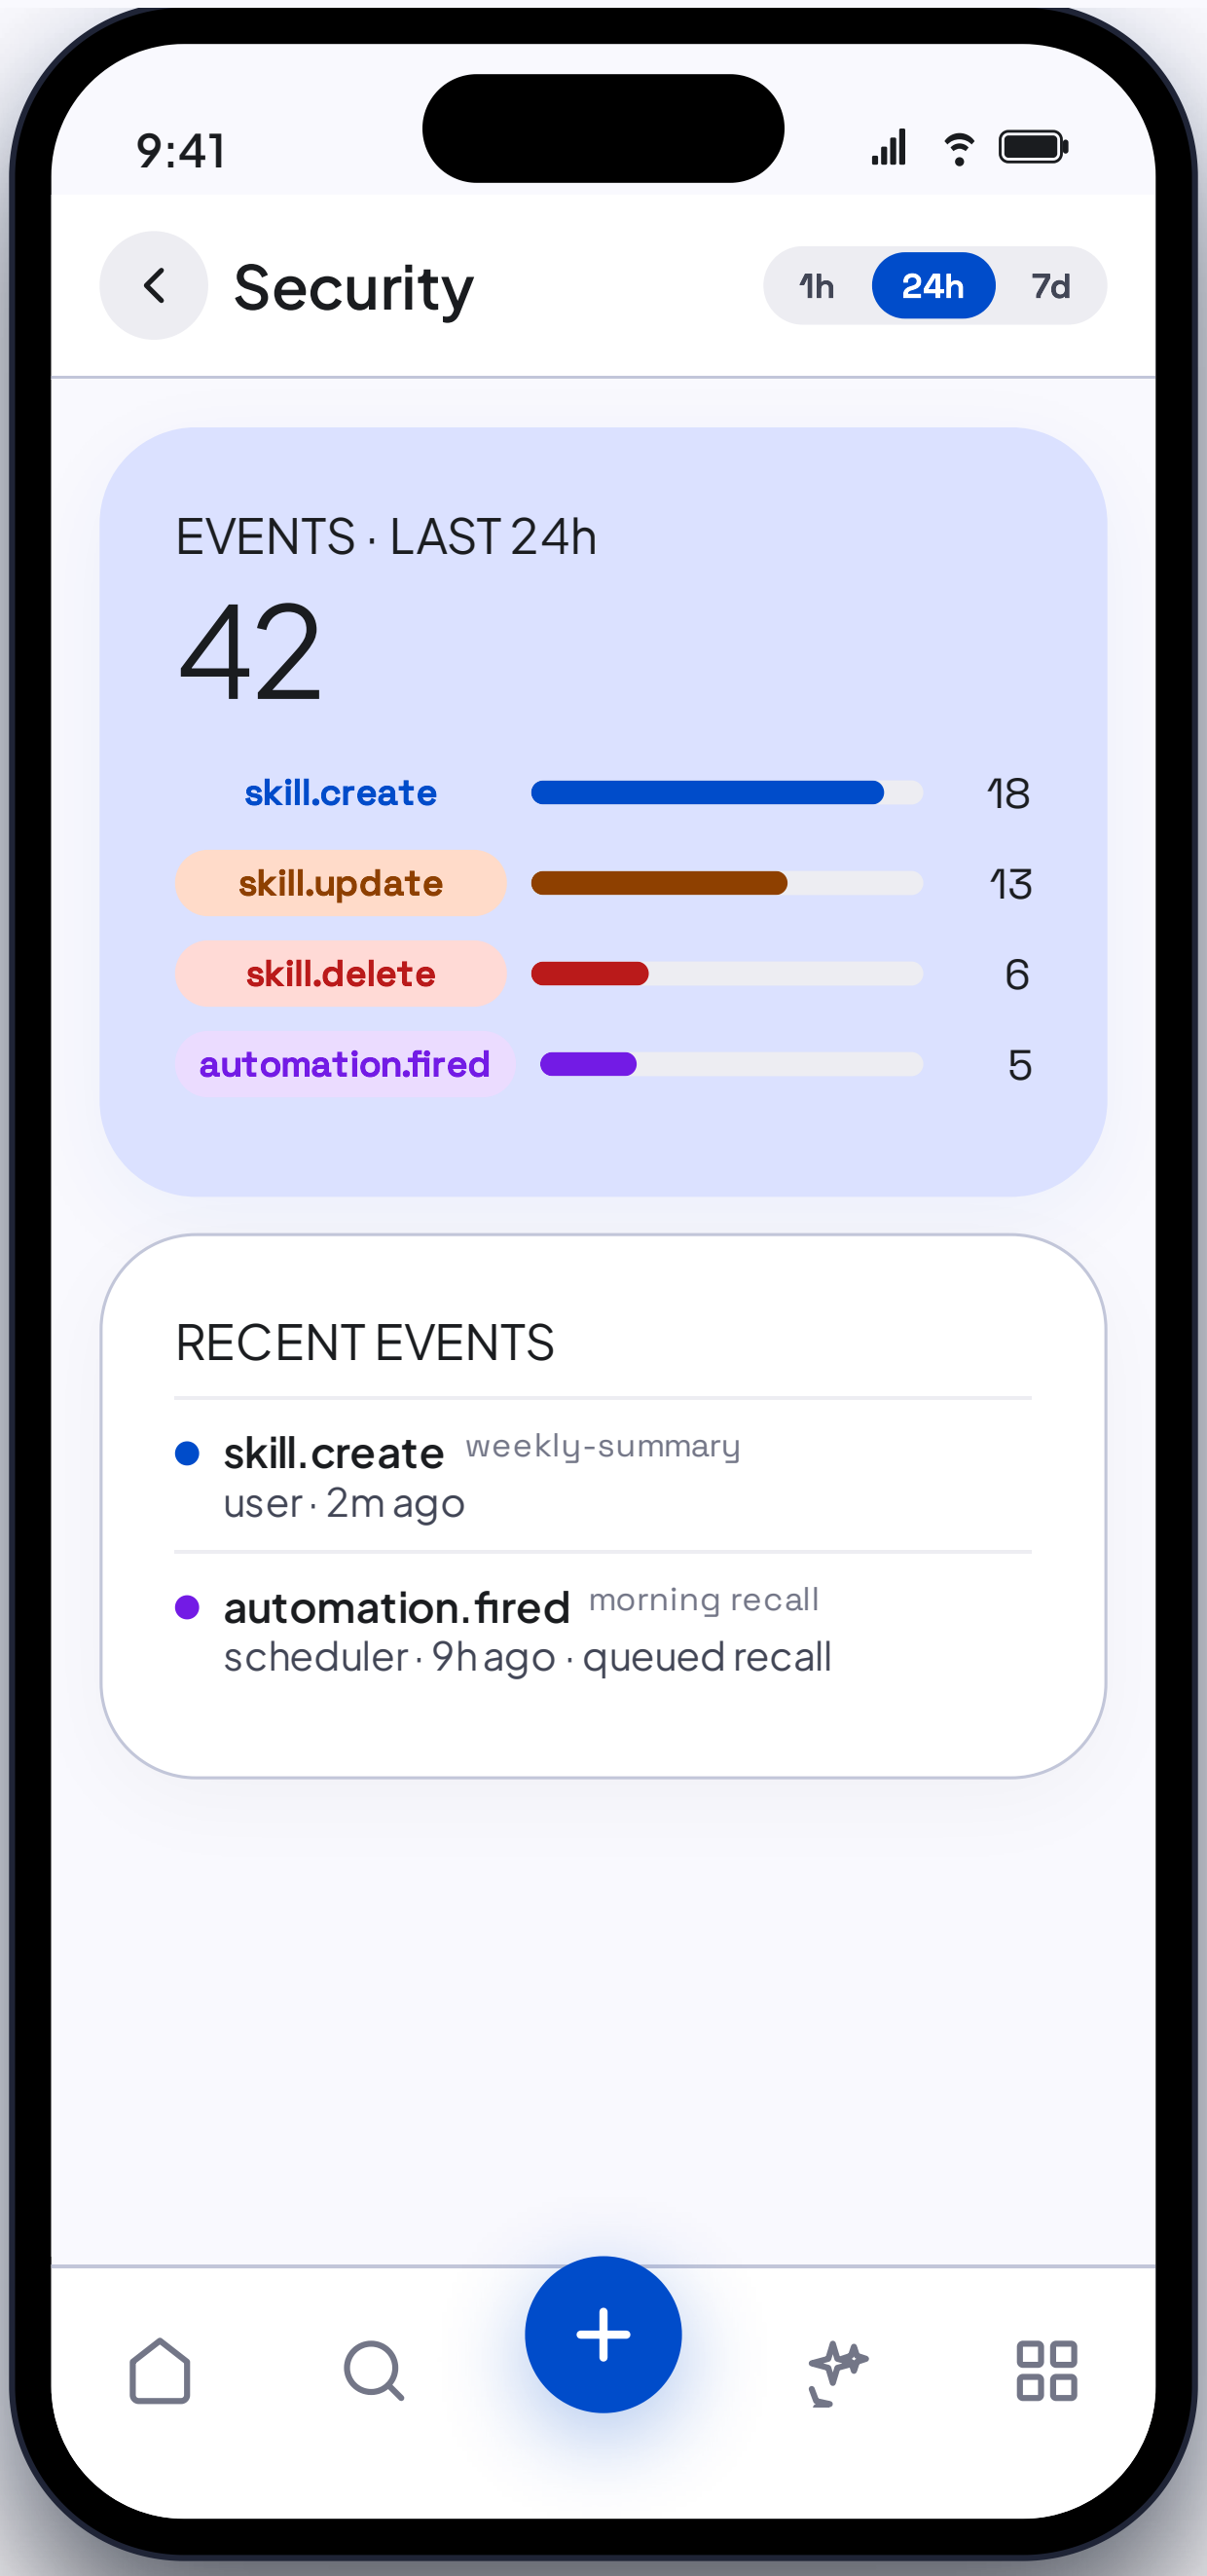
document.

auto-wiki, sourced from your diary



audit.

every action logged · sliding window



09 / IN THE BOX

Everything you need. Nothing you don't.

CAPTURE

Mobile FAB

Centre + on every screen. Note · Idea · Bug · Fix · Decision.

RECALL

Granite RAG

Vector search + recency rerank, answered with citations.

ACTION

Bob queue

Send-to-Bob from any chat. Picked up at next session.

EXTEND

Skills, your way

Author Bob skills from your phone. make install-bob deploys them.
